

tt TESSITURA TABORELLI
Partnering those who choose quality since 1895.

We make quality and inspire creativity.

More than 120 years,
worn lightly and with
great initiative.

Tradition that looks
to the future.

Founded in 1895, Taborelli has continued through the ages, crossing boundaries, revolutions and evolutions, to transform itself from a local-based silk weaver to a modern industrial group. Today we are one of the largest European producers in the womenswear industry.

Our choices are all customer-focused: we have developed a range of bespoke services, featuring speed, creativity and quality.

But they also include vision and an ability to anticipate styles and trends.

SOME OF OUR FIGURES

- + 400 looms,
- 7 plants and offices,
- + 1,500,000 kg dyed yarn,
- + 300 types of yarn in different colours.

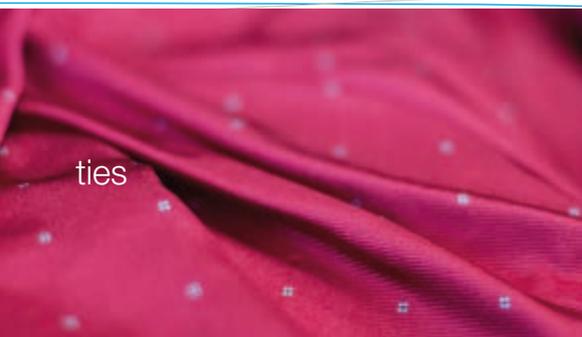

womenswear

scarves

ties

furnishings

Creative talent and efficient machinery.

We started out in an area that is traditionally dedicated to working with silk, and our master weavers are experts when it comes to making the most of their looms and the talents of our designers.

Original creativity with its roots in our past. We can in fact make use of a large archive of designs and fabrics, developed in over 120 years in business (which we are currently engaged in digitizing).

Today, Taborelli is an efficient mix of manual artisan skills and industrial productivity. Thanks to an extensive fleet of state-of-the-art machinery and to a network of local suppliers, we can deliver large volumes in fast turnaround times.

Operations that take shape in four product divisions/lines: womenswear, ties, scarves and furnishings.

Thousands of items that change over the seasons and which represent the ideal connection for the continuing dedication of a family business. Now the fourth generation of Taborellis has joined us, looking to the future with brand new enthusiasm... our story continues.

We help you to define
the style of the moment.

We sell exclusively to Italian and overseas converters
and when it comes to the world of women's fashions,
we dedicate extensive resources and painstaking
research into aesthetic, finding production solutions,
on-trend materials, special treatments,
and cutting-edge yarns.

THESE ARE SOME OF OUR FIGURES

2 collections a year

divided into summer and winter samples.

Over 1500 samples per season

composte da innumerevoli proposte a disegno e scelte colore.

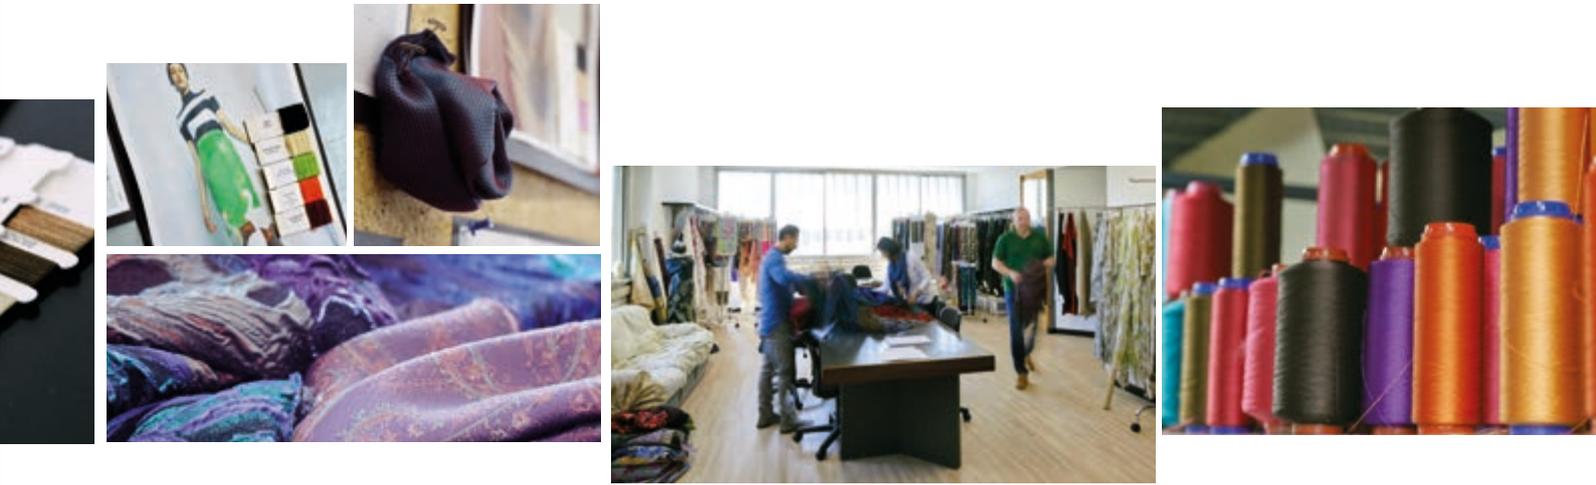

Over 300 colours in our chart

for different types of yarn: natural, synthetic and manmade,
from the finest to the thickest, in different patterns.

Over 400 Jacquard machines

to meet the different needs and demands, to be able to create
designs with repeats from 10 cm to 190 cm.

We make quality and inspire creativity.

Based on collections created by our technical staff, we make total customisation possible, using the variety of yarns and colours at our disposal.

Whatever your ideas, we have a dedicated team with vast experience to work with and advise you so that you can create styles that make the difference.

SCARVES

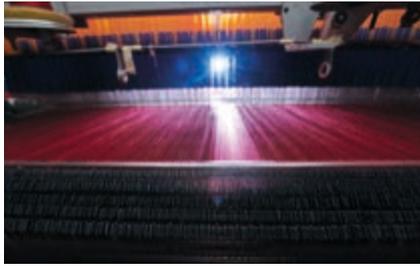

Great designs and careful customisation.

Our Jacquard machines allow us to guarantee design repeats up to 190 cm in height, with the possibility to create side fringes (leno weaves). Our fabrics are made with natural fibres such as cotton, linen, cashmere, silk, and wool, as well as manmade fibres such as modal and viscose.

We can offer you the use of our vast historic archive as well as the large sample range of finished items in our showroom. We can also customise items with your own images and company logo.

In any case, there is no shortage of creativity and original style. Our staff will work with you every step of the way, giving you advice and precise instructions regarding the finishing treatments.

Every year we create 2 collections, for a total of 120-140 samples, with the possibility to use the palette from the clothing line: the choices are practically endless!

Since 2009 we have been making scarves that we sell exclusively to Italian and overseas converters.

TIES

Flexible production and international style.

Since 1998 we have been making ties that we sell exclusively to Italian and overseas converters.

We create fabrics in an infinite combination of warp/weft colours, focusing mainly on using silk, although we also use manmade and synthetic fibres.

Established names in the international fashion industry choose us because of our quality, style and production capacity.

200 colours
of silk weft

800 colours
of silk warp

Endless
solutions

Quick turnaround times,
even for minimum quantities

Our flexibility allows us to make any type of design and also to produce minimum amounts with rapid turnaround times.

Weaves to live in, mixing comfort and elegance.

Since 2009 we have been creating and manufacturing finished fabrics for furnishings, destined to the domestic and international markets.

These fabrics stand out for their excellent quality and for their classic and contemporary patterns, leading to them being chosen by well-known names in the interior design industry.

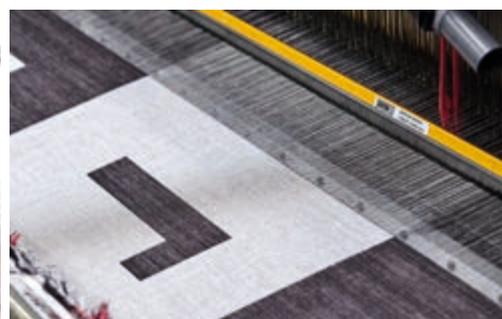

The original dies and designs are carefully filed so that even years later, we can faithfully reproduce any fabric.

Basic or Trend. The made-to-measure choice

We make two collections every year: a basic creation we maintain over time and a customised collection, based on a theme, which changes according to the styles of the moment. Whatever you might need, thanks to our production capacity and the availability of a full supply line, we can manufacture with quick turnaround times and maximum customisation.

And we always provide the certainty of a technical service that can recommend and put in place the most effective solution.

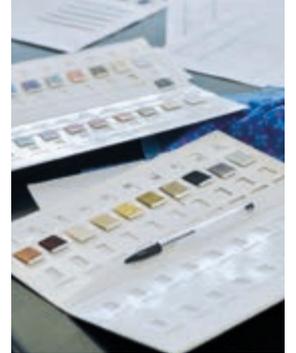

THE MANAGEMENT

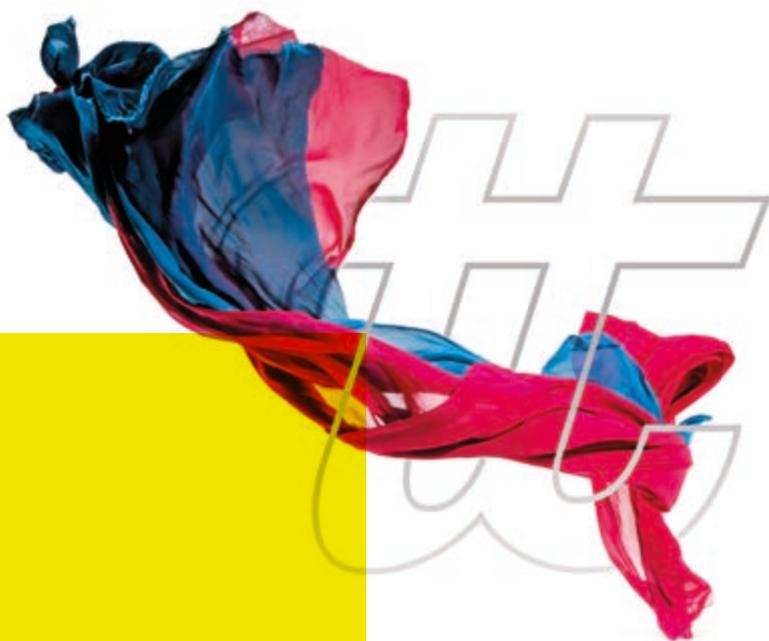

Ambrogio Taborelli
President and CEO

There are talents that are handed down naturally, without any need for words. It has always been this way for us.

A passion for quality.
A quest for beauty.
A job well done.

Values that are the foundation of our history and of our daily business, leading us to imagine ever new and marvellous solutions. Putting our hearts, minds and the precious workmanship of our master weavers into what we do.

From twisting through to the finished fabric, you will always be in expert hands.

A network to bring you speed, reliability and traceability.

We work with our partners to improve our methods, as this is the only way forward when it comes to satisfying all of your demands, especially when they involve large amounts or special treatments and all with rapid turnaround times.

We work together with our partners for you.

Through collaboration with local businesses, we are able to guarantee the highest standards for our processes, products, and services, and you will never miss out on any market opportunities.

We have selected and founded a complete, reliable and traceable textile supply line.

Torcitura Lei Tsu is Italy's largest twisting mill for polyester and cupro yarns.

TOT sells different types of yarn, both raw and dyed, starting from a minimum of 1 kg up to a maximum of 1000 kg per colour, all stock service.

La Tintoria Ambrogio Pessina is one of the most modern dyeing plants in Italy, and is capable of dyeing all types of yarn with the utmost precision, and with absolute reproducibility of the required

colour. This is also thanks to the new, ultra-efficient and super equipped in-house laboratory, managed in conjunction with Tintoria Portichetto.

G.T. 2000 is a sectional beam warping machine able to warp chains of any type. It particularly specialises in processing filament yarn, such as 20 denier and thicker ply Nylon, silk, viscose, elastomer, and all types and ply available for A.T. Acetate

M.D.P s.r.l. Specialises in creating designs for yarn-dyed fabrics for ties, clothing and furnishings as well as being able to satisfy any requirements in the textile design industry.

Finisscomo is a company specialising in processing, treating and finishing all types of fabric. Decatizing, polishing, chintz finishes, and transfer and laser printing are some of the many different treatments we offer.

Tintoria ILTEP s.r.l. Specialists in finishing woven and knitted fabrics for formal and casual clothing.

Iride s.r.l. Dyeing and finishing plant specialising in dyeing fabrics in mixed fibres (silk, linen, cotton, viscose, etc.) and in the study of finishes to give fabrics particular hands and appearances.

On the cutting
edge of history.

1895

**AMBROGIO
TABORELLI**

Ambrogio
Taborelli
grandfather
of the current
CEO, founded
Tessitura Serica
in Varese,
in the district
of Bizzozzero,
producing
fabrics in silk
for umbrellas.

1930

GROWTH

Following
market
demand,
we increased
production
and began
producing
liners in
Bemberg.

1970

CLOTHING

Ambrogio
Taborelli joined
the company
and decided
that as well as
liners, they would
manufacture
fabrics for
women's
clothing.

1994

TIES

We
opened
a new
production
plant
In Parè (CO).
We also
joined the
fabric market
for ties.

2000

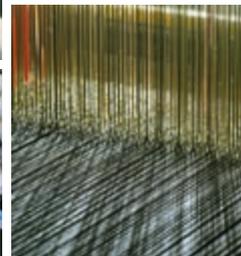

**PRODUCTION
AND STORAGE**

We inaugurated
a new production
plant in Montano
Lucino (CO).
It is located
in the nearby
Gironico, not
too far away,
and we set up
an efficient
warehouse,
designed to
deal with the
now different
needs for
storage.

2003

**A GLOBAL
APPROACH**

We opened
a production
plant in
Romania,
where we
manufacture
fabrics for
women's
fashions,
ties, and
accessories.

Enthusiasm has its own roots in history.

CERTIFICATION

QUALITY

When you
use one of
our fabrics,
we want
everything
to go smoothly,
as smooth
as silk.

You can feel it because every fabric we make reflects our quality, the painstaking care that goes into every detail of prime yarns, and cutting-edge innovations.

As smooth as silk.

It is quality that we have inherited from our founders, a quality that today guides us through all of our business choices, all strictly aimed at guaranteeing excellence and original creations.

We apply a strict quality policy both in-house and out, controlling, testing, and monitoring every stage of production with painstaking attention to detail: from selection of materials, through to the finished fabric.

These are the certifications we have achieved for our processes and products.

GRS - Global Recycled Standard

Health, safety, environment, and sustainable development.

420,000 kwh

Saving energy by using solar panels (400,000 kWh) self-produced and consumed almost entirely by the plant at Parè and Montano Lucino.

1000 sq m

Recovering the heat produced by the looms in Romania to heat over 1000 sq m of warehouse.

High efficiency

And again: replacing older looms with next-generation, energy-efficient machinery.

350,000 kWh

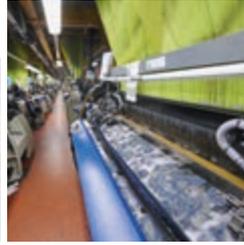

Using equipment with LED lighting for an annual saving of 350,000 kWh.

Low impact

Around 240 tons of CO2 not released into the environment which corresponds to planting almost 590 trees in one year.

Combining efficiency and sustainability with precise choices, such as adapting structures and plants to comply with the very latest standards for health and safety in the workplace.

Every day,
our company
is committed
to making
sustainable
production
an increasingly
shared and
concrete
reality.

Brave weavers, pioneering new materials.

This is what we have become over the years, accepting the challenges of the marketplace and following developments in technology and the visions of fashion designers.

Our designers and technical staff work together every day to design aesthetic and production solutions. This attitude is what inspires us to seek out the latest new trends and to try out its application at industrial level,

including focusing on the use of cutting-edge material. We were the first to make industrial use of Newlife yarn (made from plastic bottles) and we work intensively with Orange Fiber (which makes yarn from orange peel).

Research and development.
And above all, experimentation.

Orange Fiber

Newlife

Hemp

Greencel

In Taborelli research and development also involve processes and services for the customer, with the aim of improving efficiency and integration.

... are some of the cutting-edge materials we use for our most recent, evolved, future-proofed products.

We work with over
40 countries worldwide

Over 400
professionals

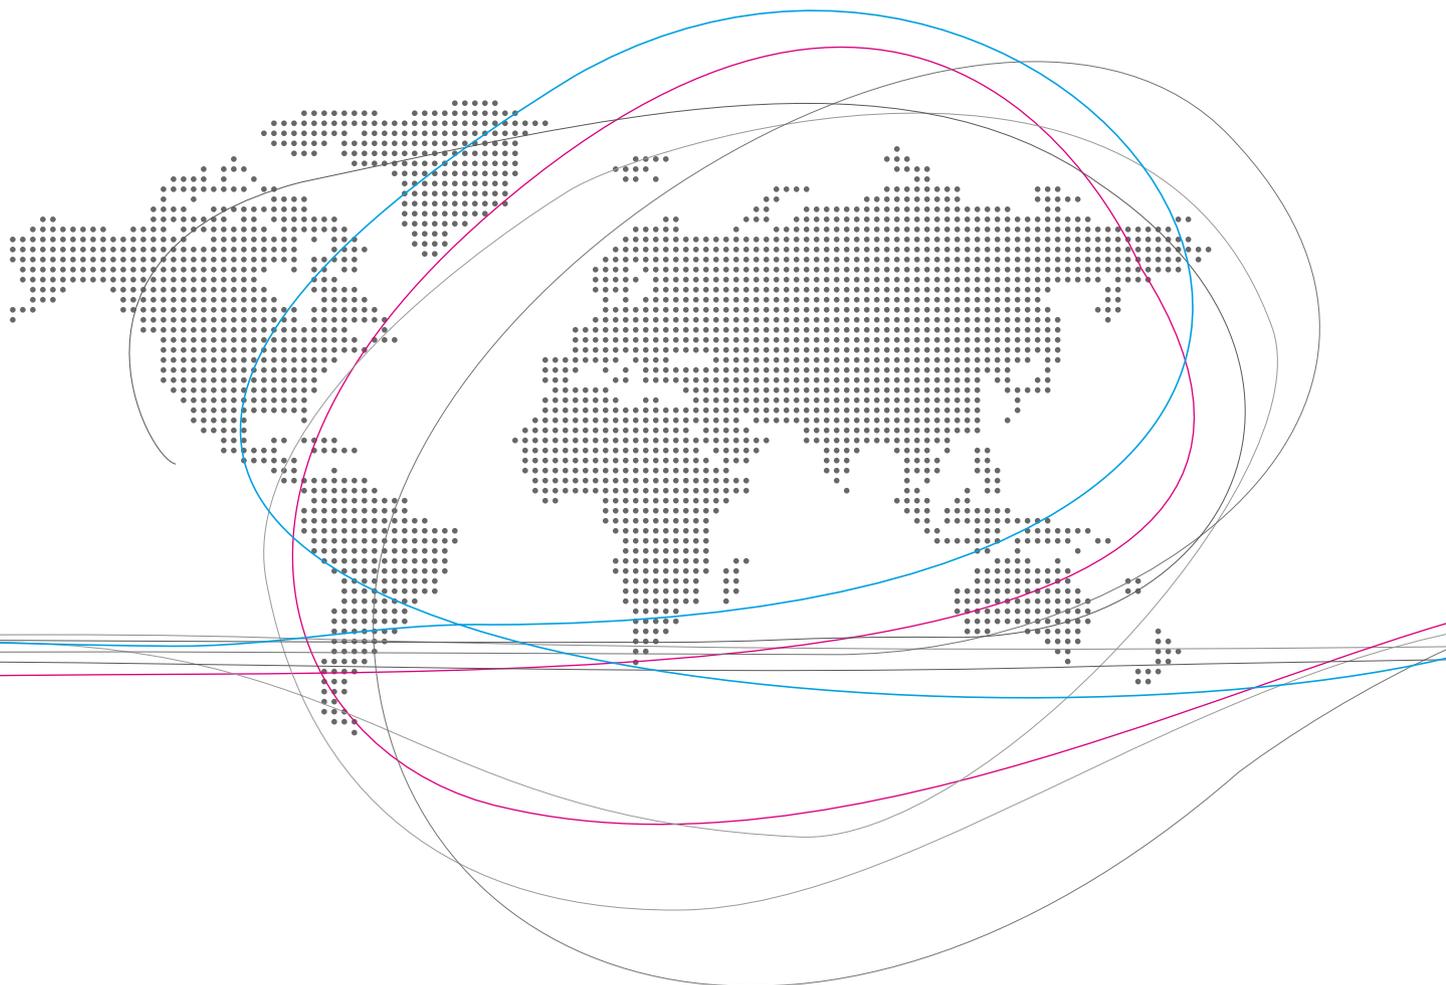

1.500 tons of ready-dyed
yarn in stock

More than 400 looms

75% exports

The spread of our fabrics throughout the world.

From fashion to furnishing, from ties to scarves, we operate on all main markets in the west and east, with a competitive range of items, offering best in class services: a certainty for those who choose to work with us.
